DIGI EUROPE recognises that the efficient flow of information in the organisation is one of the most important factors in operating and expanding the business.

Getting the 'right' person or the 'right' department helps us all.

If you have a specific question or need information on any aspect of the business, please e-mail, fax or call the personnel shown opposite.

We will be delighted to assist you with any aspect of the DIGI EUROPE operation.

DEL produces a range of In-Process and End-of-Line Weighing and Labelling Systems for Industrial Applications.

The Systems serve both complex high speed Weigh-Price-Labeling and Checkweighing Applications.

When incorporated into a production line the systems allow weighing of individual products as well as monitoring of average or minimum weights.

In this publication we try to explain some of the most recent applications and developments.

IN THIS ISSUE

- Changes at DEL
- DEL 3600 Series
- Label Applicator Range
- Remote Control Console
- 2600 Shows 'Euros'
- Year 2000
- HC-3600 Checks CDs
- Remote Total Labelling
- UK Money Matters
- DEL the 'BIG Cheese'
- EURO Average Weight
- Manuals & Parts Catalogues
- O.I.M.L. Approval

Industry UPDATE

MAY 2000

Volume 1, Issue No.1

Changes at DEL

IN LATE 1999 THE SALES AND MARKETING FUNCTION for DIGI retail systems was centralised in the Teraoka head office in Japan.

A new era opened for DEL in the UK, with the emphasis now being placed on the Industry Products.

DEL has an established reputation for high quality, value-for-money, industry solutions.

With system exports representing the largest portion of the business, greater emphasis is being placed on

support in the market-place and upon expanding the world-wide network of distributors.

To keep all the network informed of progress we are making and of new developments DEL is introducing:

'INDUSTRY UPDATE'

DEL 3600 Series

WHETHER THE VERSATILE LI, the medium speed MI or the more advanced high speed HI system, the 3600 Series has the capacity for most Weigh-Price-Labeling applications.

The 3600 series from DEL includes systems that incorporate the latest electronic control systems from Teraoka. The systems are operated

via touch-screens that allow all operating and labelling parameters to be set as well as showing statistical data and system diagnostics.

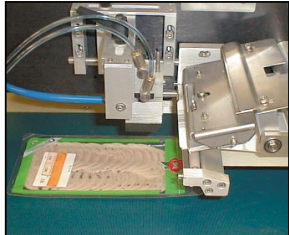

LABEL APPLICATOR RANGE

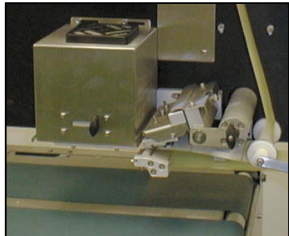

Touch Applicator

Shoe Applicator

Stamp Applicator

Airbox Applicator

REMOTE Control Console

HI-3600 Twin with Remote Console

WHEN THE CONSOLE that is normally mounted on the HI, HC, WI, MI or LI-3600 is inconvenient, it is possible to re-position it at a more convenient location using the 'remote console kit'.

The kit allows the console to be mounted up to 5 metres from the system. The link uses screened cables which, at the discretion of the installing factory can be positioned within metal conduit.

2600 Shows 'Euros'

THE COMMON European currency, the EURO, can now be displayed on the following versions of the 2600 Series Systems: HI, FI, MI, and HC-2600.

YEAR 2000

HAVING TAKEN CARE not to allow Y2K concerns to interfere with the operation of the systems, the date after the Year 2000 can be displayed using 2 or 4 digits. ('00' or '2000').

The option to display in either mode can be selected in the engineering mode within the system software.

HC-3600 Checks CDs

A SOUTH AFRICAN COMPANY packing CD-ROM disks has bought multiple HC-3600 printer/labelling systems with some special features.

An overhead sensor positioned prior to the system in-feed reads the barcode on the pack and then, using special software developed by Teraoka S.A. and DEL, looks up the relevant PLU which then prints a label containing the variable information.

HC-3600

REMOTE 'Total Labelling'

EL POZO, ONE OF SPAIN'S LEADING SUPPLIERS of sausage and sliced meats recently installed 2 x HI-3600 machines into their fully automated processing and packaging lines.

This new installation currently has 15 lines operating. More 3600 series machines are expected to be introduced later this year. This customer also requires a 'total label' and 'change of PLU' in the HI-3600 once the end of a product batch had been reached, but set by a remote computer.

Special linking software has been developed to allow this function.

HI-3600

STOP PRESS LA-2600 PRICE REDUCTION

On Quantities of 2 or more the price of the LA-2600 airbox has been reduced-even more encouragement to order!!!

UK Money Matters

THE DEL CW W-2600 Check-Weigher wide has been supplied to UK banks to verify the amount of coins in bags. The bags weighing 5 and 7 kg are weighed using the CW-Wide version of the system.

This is one customer that certainly has loads of money!

DEL the 'BIG Cheese' in the UK

THE WI-3600 Weigh-Price-Labeling System normally operates at a fixed speed, allowing 5kg packs with a max length of 300mm to be processed.

When a UK company requested the system to weigh 6kg blocks with a maximum length of 350 mm, the answer was to slow down the throughput speed.

The systems were equipped with a set of gearboxes that slowed down the in-feed and out-feed conveyors to achieve a throughput of 25 ppm!

WI-3600

EURO Average Weight for Ireland

ONE OF THE MAJOR producers of minced beef in Ireland has ordered 4 x HI-3600 'Twin' systems.

Critical to the company's requirements in selecting the DEL equipment was the ability to perform Average Weight analysis as well as the working in the Common European 'Euro' Currency.

MANUALS & PARTS CATALOGUES

ALL USER and Service Manuals for the DIGI 3600 series have been converted to MS Word format.

Parts Catalogues are available as PDF formats. The manuals can be sent by E-mail or on CD-ROM.

O.I.M.L. Approval for 3600 Series

FOLLOWING EXTENSIVE testing the models HI-3600, WI-3600, MI-3600 and LI-3600 have received approval from OIML under the WELMEC scheme.

OIML testing verifies the metrological function of the systems and, via the WELMEC scheme, the approval is accepted in most European countries.
