

# Minitran

**Miniasset Transmicro Ltd.**

## Network and Connector Products

### COMPANY PROFILE

**... The Company**

**Minitran**  
Miniasset Transmicro Ltd.

Miniasset Transmicro Ltd., trading as Minitran, is a "One Stop Shop" for computer networking and connector products for the LAN (Local Area Networking) and WAN (Wide Area Networking) markets. Leading Manufacturers products are offered alongside our carefully selected connector products and our brand items.

**Sales Support**

Our sales team is here to help. From simple tasks such as price and delivery of product specifications, to advice on products that may arise in installing structured cable or active products. If necessary one of our sales representatives can call to discuss your application.

**Right First Time!**

Our stores and systems for picking and despatch are in accordance with ISO9000. Full traceability can be achieved for all items.

**Our Suppliers**

The Industries' Leading Manufacturers >

**AMP APC AUSTIN TAYLOR**  
**Bosch AN**  
**CONC**  
**FibreCo**  
**Fujikura**  
**Hi**  
**MOD-TAP**  
**RAVDIX**  
**TRENDA**

**3COM**  
**CSMA**  
**CONEC DATA RACKS**  
**greenpar**  
**KATRON**  
**Minitran**  
**OMRON**  
**PHENIX**  
**RAYDIX**  
**Supreme Network**  
**TRENDnet**

**Technical Support**

We offer a wide choice of products with some competing technologies. Our technical support staff will advise which items best suit your application. Our demonstration area can show Active Products. From 10 Base-T through to DMSP 100 VDS, Fast Ethernet or Switching Hubs. Or maybe you would like a copy of our guide to Ethernet - "Frequently Asked Questions".

**We are here to help!**

**Product Training**

Supported by leading brands suppliers, our P r o d u c t T r a i n i n g offers hands-on experience. We are here to help! We offer a wide choice of products with some competing technologies. Our technical support staff will advise which items best suit your application. Our demonstration area can show Active Products. From 10 Base-T through to DMSP 100 VDS, Fast Ethernet or Switching Hubs. Or maybe you would like a copy of our guide to Ethernet - "Frequently Asked Questions".

**Our Guarantee**

Connector products are guaranteed for 12 months. Active products for 1.5 years, depending on the manufacturer. Some structured cabling products are guaranteed for 15 to 20 years. Should any item become faulty within the guarantee period due to a defect we will replace it or repair it.

### "NEW!" PRODUCTS

**Vanga Plug In BT to RJ45 Adaptors**

See Page 42

**AMP Category 5 Telco System**

See Pages 47-48

**Optical Cable Corporation Fibre Optic Cable**

See Pages 50-51

**Fibre Optic Connectors, Tooling, Cabinets, Microscopes, & Cable Accessories**

See Page 52-62

**Noyes OTDR**

See Page 63

**MOD-TAP Structured Wiring & ISDN Systems**

See Pages 79-85

Fax: 01279 - 653535      Minitran      Tel: 01279 - 757775

### DIN CONNECTORS

**Din Insulated Solder Socket**      **Minitran**

Part No.      No. of Degrees

1	180	DSIA
2	216	DSIA-180
3	240	DSIA-240
4	270	DSIA-270
5	282	DSIA-282

**Din Socket For Over Moulding**      **Minitran**

Part No.      No. of Degrees

1	180	DMISO
2	216	DMISO-180
3	240	DMISO-240
4	270	DMISO-270
5	282	DMISO-282

**Screened Din Solder Socket**      **Minitran**

Part No.      No. of Degrees

1	180	SDSIA
2	216	SDSIA-180
3	240	SDSIA-240
4	270	SDSIA-270
5	282	SDSIA-282

**Din Plug For Over Moulding**      **Minitran**

Part No.      No. of Degrees

1	180	DMIPRO
2	216	DMIPRO-180
3	240	DMIPRO-240
4	270	DMIPRO-270
5	282	DMIPRO-282

**Screened Din Solder Plugs**      **Minitran**

Part No.      No. of Degrees

1	180	SDSIPA
2	216	SDSIPA-180
3	240	SDSIPA-240
4	270	SDSIPA-270
5	282	SDSIPA-282

**Din R/A PCB Socket**      **Minitran**

Part No.      No. of Degrees      Plastic      Shielded

1	180	DRAP	DRAP
2	216	DRAP	DRAP
3	240	DRAP	DRAP
4	270	DRAP	DRAP
5	282	DRAP	DRAP

Fax: 01279 - 653535      Minitran      Tel: 01279 - 757775

### PANDUIT™ PATCH PANELS

**PAN-NET Modular Patch Panels**      **Phenix**

19" rack patch panels for 19 inch rack mounting. Designed to accept either shielded or unshielded **MMI-COM** jacks (see page 87). Front cover backs with white identification labelling bar. Metal panels. Black plastic panels do not have a labelling bar.

**110 Termination UTP Patch Panels**      **Phenix**

Patch panel wired to TRIA/EA 568B setting 110 IDC punch down connectors. Full Category 5 performance. Full Patchdown Tool, Part No. CT116.

Type	No. of Ports	Height	Part No.
UTP Cable	24	1U	CPA4881L108
Management	48	2U	CPA4881L108
UTP Cable	24	1U	CPA4881L108
Management	48	2U	CPA4881L108
UTP Cable	24	1U	CPA4881L108
Management	48	2U	CPA4881L108

**Patch Panel Label Products**      **Phenix**

A = Top label kit identifies patch panel ports. Kit includes 1 label and single cover.  
B = Front label kit identifies patch panel ports. Kit includes 4 labels with label covers.

**Krone Termination UTP Patch Panels**      **Phenix**

Patch panel wired to TRIA/EA 568B setting Krone IDC punch down connectors. Full Category 5 performance. Krone Patchdown Tool, Part No. CT56.

No. of Ports	Height	Part No.
24	1U	DP4888KR2NE
48	2U	DP4888KR2NE

**Labeling System, see page 95.**

Fax: 01279 - 653535      Minitran      Tel: 01279 - 757775

### KATRON TRANSCEVERS

**S.T.P 10 Base-T / AUI Transceiver**      **KATRON**

Part No.      KT-10T

**Fibre ST / AUI Transceiver**      **KATRON**

Part No.      KT-10F

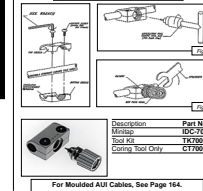

**BNC 10 Base-2 / AUI Transceiver**      **KATRON**

Part No.      KT-10B

**Minitap (Thick Coaxial Tap)**

This ethernet insulation displacement connector. Designed to provide thick ethernet cables producing a reliable connection without interrupting data transfer. Used to connect from thick ethernet to thin in conjunction with a tap driver. Requires tool kit TC17 which consists of a 3 handle crimping tool, spanner and allen key.

**ASSEMBLY PROCEDURE INTRODUCTION**

For Moulded AUI Cables, See Page 164.

Fax: 01279 - 653535      Minitran      Tel: 01279 - 757775

### KATRON 100 VG CARDS

**ISA 16 Bit**      **KATRON**

Description      Part No.  
ISA Lan Adapter Card      DP-16L

**PCI 32 Bit**      **KATRON**

Description      Part No.  
PCI Lan Adapter Card      DP-32PCI

**PCI 32 Bit 10/100 Mbps**      **KATRON**

Description      Part No.  
PCI 10/100 Lan Adapter Card      DP-32PCI2

**EISA 32 Bit**      **KATRON**

Description      Part No.  
EISA Lan Adapter Card      DP-32E

Fax: 01279 - 653535      Minitran      Tel: 01279 - 757775

### DATACOM TECHNOLOGIES

**FIBERCAT™**      **Datacom Technologies**

Testing of fibre optic cable has never been easier or less expensive. With the new FIBERCAT Performance blocks, any LANcat V Category 5 Cable Tester (or other LANcat V Two Way Handheld unit) becomes a precision, automatic optical power meter. Doing either an existing light source or a FIBERCAT Source, fibre optic cable certification and troubleshooting becomes efficient and easy.

The FIBERCAT Performance Module provides an inexpensive alternative to stand-alone power meters that require manual recording of loss references and cable loss test data. Now with a push of a button, reference loss is saved. Connect the cable, and cable loss is automatically measured. Up to 500 test results may be saved in the LANcat V memory along with an assigned circuit ID, date of test, and operator name. Test results can be output later to a serial printer or uploaded to a PC at up to 38,000 baud.

The FIBERCAT Performance Module is completely housed within the LANcat V handheld unit and thus provides maximum convenience in use. A universal threaded connector allows easy adaptation to common fibre optic cables. The FIBERCAT Module comes standard with an ST adapter.

The FIBERCAT Kit includes a FIBERCAT Performance Module and a FIBERCAT Source. The FIBERCAT Source provides LED light sources for injecting 850 nm and 1300 nm light into multi-mode fibre optic cables or other components for loss testing. Combined with the FIBERCAT Performance Module, they can be used to measure the loss in any fibre optic cable. FIBERCAT Source comes equipped with dual ST output connectors and an ST launch cable. It is battery powered, but may also run from the LANcat V or mains supply.

**Features >**

- Low cost, automated optical power meter.
- Three Wavelengths = 850 nm, 1300 nm & 1550 nm
- Precision, NIST traceable measurements.
- Detects losses due to common installation errors
- Real optical Excessive losses
- Fibre minimization
- Built-in connector
- Displays, stores, prints, and downloads test results
- Optimize for any LANcat V Series Cable Tester

Part No.      25653

**NETcat 2000**      **Datacom Technologies**

The NETcat 2000 series of hand-held LAN diagnostic instruments quickly solve common cabling, network problems. AC mains adapter and carrying case included.

**Features >**

Product	NETcat 2100	NETcat 2200
Network Interface	UTP - BNC	STP - BNC
Protocols	802.3/10/16	802.3/10/16
Supported	DECnet, AppleLink	DECnet, AppleLink

**NETcat 2100**      **NETcat 2200**

25653      25654

**Accessories for LANcat / NETcat**

Product	Part No.
NETcat 2100	25653
NETcat 2200	25654
NETcat 2100	25653
NETcat 2200	25654
LANcat V	25655
LANcat V	25656
